# Neurotoxins | Starting at \$6/unit

Our neurotoxin treatments are a perfect option for non-surgical facial rejuvenation. These FDA-approved injectable treatments work by temporarily relaxing the muscles responsible for creating dynamic wrinkles, resulting in smoother, more youthful-looking skin.

**BOTOX®** remains the most recognized name in neurotoxin treatments, and for good reason. With decades of research and millions of satisfied patients worldwide, BOTOX® consistently delivers reliable, natural-looking results for crow's feet, forehead lines, and frown lines.

**Jeuveau®**, often called "Newtox," offers similar results to BOTOX® with its own unique formulation. Many clients appreciate having options, and our skilled injectors can help you determine which product will work best for your specific needs and goals.

**Dysport®** spreads slightly more than other neurotoxins, making it particularly effective for treating larger areas like the forehead. Its onset is often quicker than other options, with some clients seeing results in as little as 2-3 days.

**DAXXIFY®** represents the newest advancement in neurotoxin technology, with results that can last up to 6 months—significantly longer than traditional options.

***This breakthrough treatment is perfect for clients who want to maintain their results with fewer appointments.***

**Xeomin®** is often called the "pure" neurotoxin because it contains no additives, reducing the likelihood of developing resistance over time. It's an excellent choice for clients who have used other neurotoxins extensively or prefer a minimalist approach.

**Lip Flips** offer a subtle enhancement that's perfect for clients who want fuller-appearing lips without the commitment of filler. By relaxing the muscles around the mouth, a lip flip allows more of your natural lip to show, creating the appearance of fullness and reducing fine lines around the mouth.

# Fillers | Starting at \$600/syringe

Dermal fillers represent dedicated artistry in aesthetic medicine, allowing us to restore volume, enhance features, and create beautifully balanced results that look completely natural. Our extensive selection ensures we can match the perfect product to your unique needs.

**Restylane-L®** contains lidocaine for enhanced comfort during treatment and is versatile enough for both lip enhancement and facial contouring. Its smooth consistency makes it ideal for clients seeking natural-looking volume restoration.

**Restylane® Defyne** is specifically formulated to move with your facial expressions while maintaining correction. This makes it perfect for nasolabial folds and marionette lines, areas that require flexibility and natural movement.

**Restylane® Kysse** is specially designed for lip enhancement, providing natural-looking volume, smooth texture, and long-lasting results. Its unique formulation integrates seamlessly with your tissues, creating soft, kissable lips while maintaining flexibility for natural movement.

**JUVÉDERM® ULTRA** provides smooth, even results for lip enhancement and shallow to moderate facial wrinkles. Its gel consistency creates beautiful, soft results that integrate seamlessly with your natural tissues.

**JUVÉDERM® ULTRA PLUS** offers more robust correction for deeper lines and more significant volume loss. Its thicker consistency makes it ideal for dramatic improvements while still maintaining natural-looking results.

**JUVÉDERM® VOLBELLA®** is best used for subtle lip enhancement and fine lines around the mouth. Its unique formulation creates soft, natural-looking results that last up to a year.

**JUVÉDERM® VOLBELLA® XC** includes lidocaine for enhanced comfort, making the treatment experience is more pleasant while delivering the same beautiful, natural results.

**Versa™** offers exceptional versatility and longevity, with results that can last up to 12 months or more. Many clients love its smooth consistency and natural-looking results.

**Evolysse™ Form** is a versatile dermal filler that targets moderate facial wrinkles and volume loss. Its smooth gel consistency allows for precise shaping and subtle contouring, delivering natural-looking results that complement your facial expressions.

**Evolysse™ Smooth** is formulated for fine lines and superficial wrinkles, creating soft, even correction that blends naturally with surrounding tissues. Its gentle, smooth texture makes it ideal for clients seeking subtle, refined enhancements with a polished finish.

**HYLENEX** is an enzyme that can reverse hyaluronic acid fillers if needed, providing both practitioners and clients with peace of mind. While complications are rare, it's comforting to know that adjustments can be made if desired.
